

Skills

Programming languages & Tools: C, C++, C#, HTML, CSS3, JavaScript, Typescript, Java, Git, SQL, Apex, SOQL, Python

Technologies & Frameworks: .NET Core, Angular, Keycloak, Salesforce, Unity, WPF

Projects

Employee Management Application (TIAC)

- Designed and built a web application with admin and employee roles.
- Admins can manage employee profiles, team details, and have filtering, sorting, and exporting options.
- Employees have detailed profiles and secure login with Keycloak.
- **Technologies:** .NET Core Web API, Angular, Keycloak

Timesheet Application (Intermino) | <https://github.com/danijelmiklosi01/TimesheetApp>

- Developed a timesheet app with distinct views for employees and managers.
- Features include timesheet management, project addition, and role-based permissions.
- **Technologies:** Salesforce, Apex, SOQL

Bus Station Management System | <https://github.com/InformacioniSistemiProjekatEducons/AutobuskaStanica>

- Collaborated on a system for bus station management with admin and worker roles.
- Features include ticketing, bus line management, and passenger tracking.
- **Technologies:** Java

Food Store Application | <https://github.com/danijelmiklosi01/UniverOrganaProject>

- Developed a food store app with inventory management, order reviews, and search functionality.
- Features include warehouse access and role-based functionality for chefs.
- **Technologies:** .NET, C#, WPF

Experience

Salesforce Internship (Intermino) | [Internship Certificate](#)

Cloud Internship (AWS,GCP) (Devoteam) | [Presentation of my work at Internship](#)

Full-stack developer Internship (.NET, Angular) (TIAC)

Education

Educons University, Information Technology Engineering - Year of graduation: 2024
